

University of the Virgin Islands

Astronomy Lecture

Presented by

"Shadow on the Sun: The Hype Behind the Solar Eclipse"

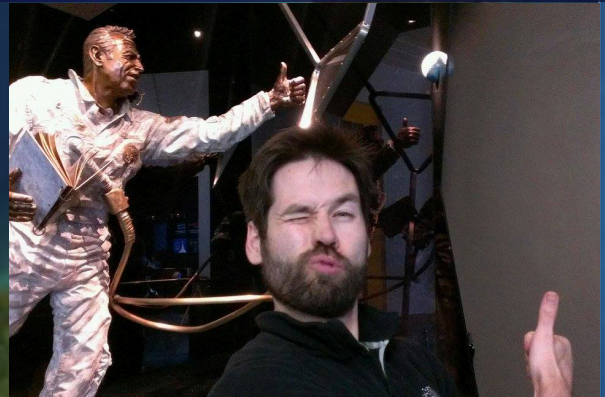

*By Dr Stephanie LaMassa
(Space Telescope Science Institute)*

"What is an eclipse? What is a solar eclipse? Why don't we see eclipses more often? What can we expect to see this August when the moon blocks the sun?"

"Why bad movie science is good for you"

*by Dr. Bruce Alastair
(University of Edinburgh, UK)*

"Why bad movie science is good for you...sometimes subtle, sometimes ridiculous, it can help set your inner nerd free. We'll dive into some of the best/worst of the astronomy-themed science Hollywood has to offer."

Friday July 14th 7pm
UVI Administration & Conference Center
